Dual national French-Australia

Experience

Sep 18–Jul 2026 **Senior Software Engineer**, *Canva*, Sydney (Australia)

- Owned the "object panel" of Canva's editor. Integrated generative AI features for elements and templates. 18 AI MAU. +1.3% design published, 25% generations.
- Core contributor to "Wonder Box", an AI-powered search and generation surface launched at Canva World Tour 2025 under a hard deadline — driving +7.2% Pro subscriptions, +22% AI engagement and +0.4% retention.
- Remediation of critical accessibility gaps ahead of the European Accessibility Act deadline, protecting \$19.3M in ARR exposed to contractual abandonment. Introduced automated testing of a11y.
- Founding engineer on the Canva Creators template program, empowering thousands of designers to contribute to Canva's template library through templates publishing tools, creator profiles and dashboards. Promoted to Senior Engineer on the strength of this work (ca. 2021). Temp lead of the creators scalability team.
- Ran the frontend architecture onboarding session for new engineers, helping newbies understand Canva's frontend codebase.
- Authored articles in the company-wide engineering handbook on frontend topics (architecture, state-management tools, accessibility), and design doc (RFC) processes.
- Launched Photos Unlimited, a subscription giving users unlimited access to Canva's stock photo library, reaching \$1M+ ARR (later merged into Canva Pro).
- Rebuilt the Marketplace frontend on Canva's 2.0 stack (TypeScript, React, MobX), serving 100M+ templates and elements. Built using an SDUI approach.
- Mentored more than 10 junior to mid-level engineers throughout my tenure.
- Conducted 90+ technical interviews for frontend software engineering roles.

Sep 2015–Aug 2018 **Software Engineer – Apprentice**, *Amadeus*, Sophia Antipolis (France)

- Developed a seat selection module for a B2B rail ticket selling platform – Angular, Python, C++
- Contributed to the ng-bootstrap open source project, focusing on accessibility – Angular, Bootstrap, WCAG 2.0, Karma
- Designed and developed a B2C web application to sell rail tickets – Angular, Redux, Java, Swagger

Apr–Aug 2015 **Android Developer – Intern**, *FabZat*, Bordeaux (France)

- Maintained and developed new features for an in-app merchandising shop Android plugin – Java

Apr–Jun 2014 **3D Solutions Developer – Intern**, *Intelligent Mechatronics and RFID (IMaR)*, Tralee (Ireland)

- Wrote scripts to parse, filter and transform LiDAR data to 3D models – Python
- Built web and augmented reality visualization solutions – Potree, Android, Vuforia

Education

2015–2018 **Master's degree in Software Engineering**, *University of Technology of Compiègne (UTC)*

2014–2015 **Bachelor's degree in Computer Science**, *University of La Rochelle*

2012–2014 **Advanced Diploma in Computer Science**, *IUT of La Rochelle*

Skills

Frontend	TypeScript, React, MobX, Jest	Backend	Java, Spring, AWS
Databases	MySQL, PostgreSQL, MongoDB	Other	Protobuf, REST, SOAP
Tools	Git, Atlassian Suite, Figma, UML		
Languages	French (native), English (fluent, TOEIC : 975/990)		

Misc

Interests Travel, Chess, Coffee, Sci-Fi, Drone photography

Sports Strength training, Running, Tennis, Surf, Skiing
